CREE
AUTHORIZED DISTRIBUTOR

Horticulture SOLUTIONS

CREE's broad portfolio of horticultural optimized LEDs delivers the industry's highest output and efficiency to enable the replacement of HPS while using less power. Cree's white LEDs and color LEDs allow manufacturers to control the level and spectrum of light for different stages of plant growth, even in extreme conditions.

PSB Series

The World's Smallest Programmable Drivers to Save Energy, Time and Money

ERP's UL Class P next generation PSB series drivers are one fifth smaller than similar capacity drivers, programmable for flexible deployment in a broad range of constant current applications; connected with wired and wireless controls and high efficiency to reduce electricity consumption. A unique dimming programming feature offers 5 pre-programmed choices or a custom profile to be created.

High Optical Power UV LEDs

ECO Friendly
Long Life Span
High Durability
Small Form Factor

UV LED is an LED that emits ultraviolet rays and is a light source that replaces UV lamps for traditional hardening/ exposure and sterilization. LG Innotek UV LED's have high usability thanks to long lifespan, high durability and a small form factor of less than 1cm.
